HOW THIS MACHINE HELPS YOUR HEALTH:

The human body is electric, including our cells. Disorders and diseases have vibrational frequencies that are incompatible with healthy cells, and they disrupt the cells natural oscillation and polarity. This disruption creates imbalance within each affected cell. When cells are in an imbalanced state, they are unable to facilitate the body's functions needed for healing, as well as discharging heavy metals, parasites, and other toxins. When cells are fully charged, they have more oxygen, the results can be astonishing. Studies show that an overall balancing effect occurs, along with a significant increase in the number of negative ions. Ions are atoms or molecules that have lost or gained electrons [Free radicals are unpaired electrons]. If the atoms or molecules lose electrons, they become positively charged ions. If they gain electrons, they become negatively charged ions. The ionic technique of cleansing thru feet provides a full body purge of all vital organs, resulting in reduced menopause symptoms, menstrual cramps, sexual health problems, skin problems, acne, sleep problems, restlessness, stress, toothaches, vaginal dryness, wrinkles, candida and yeast infections.

SOME OF THE POSSIBLE BENEFITS FOOT DETOX:

What is the significance of each color? Believe it or not, it is important to eat a variety of colorful foods in order to assure balanced chemistry. Every color is a chemical and has a chemical value. Chemical components of foods contribute to their acid-alkaline balance. As a general rule, Green Foods nourish the immune system, especially the liver and gall bladder. Red Foods nourish the endocrine system, including the pituitary gland, as well as the heart and small intestines. Orange Foods nourish the joints. Yellow Foods nourish the digestive system, including the spleen, stomach, and pancreas. Yellow-green foods nourish the kidney, bladder, urinary tract, female/prostate area. Brown Foods nourish the liver. White Foods nourish the respiratory system, namely the lungs, but also the large intestines, lymphatic system and skin. Black Foods nourish the circulatory system, kidneys, liver, gallbladder and bladder. White foam indicates mucous from lymph. White cheese like particles indicates probable yeast. Black flecks indicate heavy metals. Red flecks indicate blood clot material. By the same token, when the water is changing colors, each color represents the part of the body that is being detoxified.

detoxifying foot bath

This foot bath is used to cleanse, balance and enhance the bio-energy (the vital energy force present in the breath of bodily fluids). This energy is the electro-magnetic force that is stored within the body and utilized by our cells. Chinese medicine refers to this energy as the "CHI". The complex energy fields permeate and realign the body's energy field while improving oxygen levels. While the foot bath is widely used to increase energy (both physical and mental energy), vitality, and stamina, at the same time, it detoxifies the body of toxins, chemicals, radiation, pollution, synthetics, and other foreign material trapped in the skin layers that have clogged up the body's systems of elimination. As believed in Reflexology, each foot is actually a channel, a conduit, through which your body attempts to cleanse itself of toxic wastes and heavy metals that are building up in many parts of your body. During the foot bath, you will actually see the cleansing process take place as the water interacts with a compound electric current and magnetic field structure. This body cleansing process results in the correct frequency required for cells to return to a healthy state, and to release waste that has been bonded to them over the years. This detoxification therapeutic procedure also enhances the effects of other therapies.

WHAT DOES THE WATER TELL US....
