

THE IONIC DETOX FOOT BATH

The Ionic Cleanse Detox Machine is a high-tech water detoxification system that facilitates the body's ability to heal itself.

The Ionic Cleanse Detox Machine is a water foot-bath that utilizes stainless steel electrodes, which cleans, balances, and enhances bio-energy, a vital force present in the body's fluids.

For centuries Chinese medicine has referred to this energy as "Chi", a complex energy field permeating and realigning the body's energy field while improving oxygen levels. While the Ionic Cleanse Detox Machine is widely used to increase mental and physical energy, it also revitalizes and increases stamina while voiding the body of chemicals, pollution, radiation, synthetics, toxins, and numerous amounts of foreign substance trapped in layers of the skin.

The machine's internal cleansing process includes parasite cleansing and liver detoxification that subsequently results in less fluid retention, reduction of inflammation, improved memory, improved bladder control, a more balanced PH, a stronger immune system, and significant pain relief, inclusive of but not limited to arthritis, gout, and headaches.

Reflexology teaches us that each foot is actually an outlet through which the body attempts to cleanse or rid itself of heavy metal and toxic waste built up in numerous areas of the body. While using the Ionic Cleanse Detox Machine, you will actually see the cleansing process as the water interacts with a compound electric current along with a magnetic field structure.

Subsequently, this cleansing process attains the correct frequency required to restore cells to a healthy state, while releasing years of bonded waste. It is important to realize that the Ionic Cleanse Detox Machine enhances the effects of other therapies.
